## IPL group | Environmental policy

---

IPL group is a customer focused, innovative, value-driven organisation which designs, manufactures and supplies infrastructure products, services and solutions to customers worldwide. High quality innovative products, creative engineered solutions, excellent customer service and socially responsible business practices define this leading Irish company since its establishment in 1975.

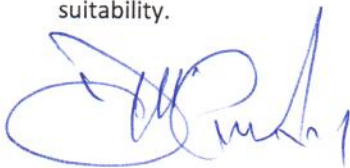

Omni Instruments Limited established in 2004 and a subsidiary of IPL group carries out product installation, calibration and technical services for the organisation. Omni Instruments is committed to good corporate governance and high standards of conduct in all aspects of its business operations.

IPL group and Omni Instruments' environmental policy conveys our understanding and effective management of the actual and potential environmental impact of our activities. This extends to all our business activities, core products and operational procedures which have the potential to adversely affect the environment. To this end we have implemented an environmental management system in line with ISO 14001.

We are fully committed to the continual improvement of the environmental management system that aims to prevent environmental damage and furthermore minimises energy and resource usage, ensuring that the principles of sustainable development are operated throughout all IPL group operations. In summary, our policy and procedure is to:

- Identify the significant environmental aspects and impacts of our business and implement an appropriate environmental management system
- Minimise and where reasonably practicable eliminate any adverse impact on the environment arising from the activities of our business.
- Minimise the use of energy, resources consumed and waste produced.
- Comply with legal requirements and where appropriate go beyond minimum legal compliance of environmental legislative bodies and customer expectations.
- Make resources available to manage our proactive environmental management system and ensure all personnel are trained and informed of their roles and responsibilities.
- Establish and measure environmental performance against objectives and targets

The environmental policy is reviewed annually by management to determine the policy's continuing suitability.

Donagh McCarthy  
IPL EHS Manager

Chris Pullen  
Omni HSQE Manager
