

Case Study

RS115 | Westminster

Project: Bollards & Railings, Houses of Parliament, Westminster, London, England
Product: RS115 sockets

RS115 | Westminster...

Bollards and railings at Westminster used for security and crowd control must also be removed for parades and other ceremonial occasions. RS115 sockets were specified for this installation due to their high-strength ground-level finish to ensure the safety of visitors, parading troops and horses. A new RS lid with portcullis design was commissioned and cast as part of this prestigious installation.
