

Case Study

RS140 | Leven

Project: Leven Bus Station, Leven, Fife, Scotland
Product: RS140 & RS115 sockets

RS140 | Leven...

Fife Council used RS115 and RS140 sockets for the installation of bollards and benches at Leven Bus Station. RS socket foundations are designed to withstand vehicle impact damage and continue to function beyond the life-span of installed street furniture items. In doing so, IPL group's RETENTION SYSTEM™ sockets provide a long-term sustainable foundation solution and ensure cost-effective maintenance and replacement of street furniture without the expense of disruptive excavation. The bollards and benches can also be temporarily removed, and the RS socket foundation sealed with an integrated pedestrian plug that is flush to the ground to ensure pedestrian safety.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © March 2019.
