

# Case Study

## RS168 | Newcastle

**Project:** Pedestrian Guardrail, Newcastle-upon-Tyne, Tyne and Wear, England  
**Product:** RS168 sockets

### RS168 | Newcastle...

In Newcastle, strong decorative Ø168mm posts with pedestrian guardrail panels were installed in standard base RS168 sockets designed to withstand vehicle impact. Pedestrian guardrail is prone to vehicle damage that entails expensive and disruptive repairs where foundations have to be excavated and reinstated for replacement railings. Installing these railing posts in RS sockets means no future foundation excavation is required and damaged posts and panels can be replaced quickly and economically.
