

Case Study

RS50x50 | Stoneymollan

Project: A82, Stoneymollan, Dunbartonshire, Scotland
Product: RS50x50 sockets

RS50x50 | Stoneymollan...

On the A82 at the approach to Stoneymollan roundabout, Scotland TranServ, the operating company responsible for the management and maintenance of the trunk road network in south west Scotland have installed an anti-glare screen in IPL group's RETENTION SYSTEM™ sockets. Located at this busy junction with a high-risk of vehicular impact, the screen shields motorists from oncoming traffic on the opposite carriageway and prevents driver distraction. The screen is designed in sections, fitted on plate steel segments and installed in RS50x50 sockets. Damaged sections are replaced quickly and easily without further excavation or ground works reducing traffic disruption, time on-site and maintenance costs.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © March 2019.
