

# Case Study

## RS76 | Vilnius

**Project:** KGB Museum, Vilnius, Lithuania  
**Product:** RS76 sockets

### RS76 | Vilnius...

IPL group's RETENTION SYSTEM™ sockets and Ø76mm core bollards from our RIVERS range of street furniture are used throughout Vilnius for various infrastructure solutions. At the entrance to the Museum of Occupations and Freedom Fights which houses exhibits honoring the Lithuanians killed in this former KGB headquarters and prison, access control and management of pedestrian crossings saw the use of RS76 sockets for the installation of removable Glyde bollards. These bollards are locked-in place and when required removed for authorised vehicle access during events and street maintenance. When the bollards are not in use, all RS sockets are securely plugged with an integrated plug that is flush with the ground to ensure pedestrian safety.

Further information on the RETENTION SYSTEM sockets for post installation is available at [www.retention-system.com](http://www.retention-system.com)
