

Case Study

RS76x76 | Scarborough

Project: Scarborough, North Yorkshire, England
Product: RS76x76 sockets

RS76x76 | Scarborough...

IPL group's RETENTION SYSTEM™ sockets were used for the installation of guardrail at Scarborough Open Air Theatre. As part of a major renovation project to infill the lake frontage and increase audience capacity, a new guardrail section was installed in RS76x76 sockets and separates the area in front of the stage from the tiered seating. The guardrail is now semi-permanent and can be removed and re-installed as required. This infrastructure solution adds further flexibility to the design of Scarborough OAT. Events can be organised with increased crowd capacity, railing can be removed for maintenance requirements, emergencies and for vehicle access during event setup.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © May 2019.
