## **Features**

- Microprocessor based
- 4-20mA Analogue Output
- Voltage free relay contacts
- · RS485 digital interface
- · Alphanumeric dot-matrix display
- · "One Person" calibration
- · Small size
- Certified ATEX II 2 G Exd IIC T6
- Low power consumption
- Standalone operation

The Monicon S500L-VQ101 is a self contained, intelligent gas sensor that offers a host of sophisticated features to provide fast, reliable warnings against concentrations of hydrogen sulphide (H<sub>2</sub>S).

The S500L-VQ101 will operate as a standalone instrument or in conjunction with a controller or a computer. The S500L-VQ101 is housed in an attractive, compact enclosure and may be configured or calibrated by one person, without declassifying the hazardous area.

The gas concentration is indicated on a 4 character alphanumeric display which also indicates instrument status. The S500L-VQ101 is user programmable and no physical adjustments are necessary during calibration as the on-board computer assists the calibration procedure. All user variables are stored in non-volatile memory (EEPROM) and retained indefinitely even during total power failure.

## Typical Applications for the S500L-VQ101

- Chemical plants & refineries
- Drilling rigs & platforms
- Sulphur removal & recovery
- Well head sites
- Mud-logging operations
- Oil & gas production platforms
- Gas collection & distribution facilities
- Waste water treatment facilities
- Paper mills
- Tanneries
- H,S based heavy water production

The S500L-VQ101 uses a solid state gas sensor combined with advanced, surface-mount microprocessor and firmware technology.

Hydrogen sulphide being adsorbed onto the surface of a heated solid state element causes a change in the electrical output of the sensor element. This electrical change is measured, processed and linearised by the on-board CPU to give a signal proportional to the gas concentration. A watchdog circuit monitors the system operation and resets the CPU if a failure is detected.

The S500L-VQ101 is calibrated or user-programmed by activating the magnetic switches with a magnet. The operator is then guided through a variety of options by a user-friendly menu. The CPU constantly verifies system operation. In the unlikely event of a fault, the operator is alerted with a helpful diagnostic display.

## S500L-VQ101 Specifications

Supply voltage Nominal 24Vdc (operates from 20Vdc to 35Vdc)

Power consumption 2W nominal, 2.3W maximum

Circuit protectionElectronic current limiter, 1.5A auto-resetTransient ProtectionPCB mounted, 3 Joule, Metal Oxide VaristorAnalogue output4-20mA current source referenced to 0V

Analogue output load500 Ohms maximumOperating temperature $-20^{\circ}C$  to  $+60^{\circ}C$ Storage temperature $-40^{\circ}C$  to  $+66^{\circ}C$ 

Humidity range 20%RH to 80%RH (Non-condensing)

Preconditioning Requirements Operational: 30 seconds, Specification: 24 hours

Full-Scale range H<sub>2</sub>S 100ppm

 Response time (T90)
 Typically <60 seconds</td>

 Linearity
 ±5% (@50% RH and 20°C)

 Repeatability
 ±2% of FSD (@50% RH and 20°C)

 Resolution
 2% of FSD (@50% RH and 20°C)

Sensor lifeTypically 3-5 yearsWeight2.0Kg (including sensor)

RS485 operating mode (optional) Slave mode, half duplex, polled

Max. units on RS485 loop100RS485 comm parameters1200-N-8-1RS485 error checking1 byte checksum

Unit interrogation time 40mS

Relay contacts

SPST, NO, 125V @ 0A5 (30V DC @ 1A) each for A1 & A2

Option setting

Digital setting (all options fitted as standard and user selectable)

Alarm setting

Digital setting (adjustable between 10% and 90% of full scale)

Energised/de-energised. Enrichment/deficiency. User selectable

ATEX certification II 2 G Exd IIC T6 Tamb -20°C (Certificate number Baseefa 08ATEX0056)

Recommended calibration flow rate 500mL per minute

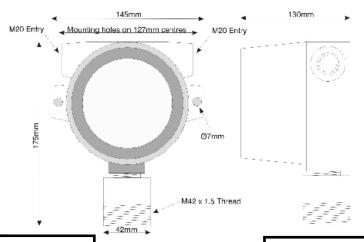

Mounting holes2 holes, diam 7mm, spaced 127mmUser variable storageNon-volatile RAM (EEPROM)

Electromagnetic Conformance (EMC) Complies with EN50081 and EN50082

Cable gland entries 2 entries, each M20 x 1.5

**Terminations** PCB mounted terminal blocks to accept 1.5mm<sup>2</sup> cable

Enclosure material Aluminium pressure die-casting, chromated with blue epoxy finish
