

Case Study

Sampling Kiosk | Monaghan

Project: Sampling Kiosks, Glaslough Tyholland GWS, Monaghan, Ireland

Product: Pillars & Kiosks

Sampling Kiosk | Monaghan...

In Glaslough Tyholland Group Water Scheme, IPL group worked with scheme manager Padge McKenna on a solution for new sampling procedures. Old procedures required gaining permission and calling into the house nearest the end of the scheme to take a water sample from the kitchen sink. Monaghan County Council's new requirements saw a private water testing company also now involved in the sampling and IPL group suggested roadside sampling kiosks to facilitate the required testing without the need to enter private residences.

Internally these kiosks are insulated and fitted with long stainless-steel swan neck taps that can be heated for sterile testing. The solution has proved successful and is ideal for end of line sampling requirements.

Further information on Control pillars and kiosk installation is available from IPL group. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © April 2020.
